Partner from Poland is head and will be responsible for the conference. The Hungarian partner will work closely with the leadership of the section. Other experts from Czechia and Slovakia are invited as experts with contributions.

5.

➔ **Training for university teachers (Product)**

01/10 – 15/12/2024

National
level

Presentation of possible use of AI applications in education (including relevant examples). This is the first version of the training material based on the systematic literature review and the team's discussion (online meeting), which will be presented at **the national level** in the national language. Workshop for teachers from institutions participating in the project. The aim is to innovate and change the teaching process using AI tools.

6.

Training for university students (Product)

01/10 – 15/12/2024

This training will not be in the form of a workshop, but instead will be about specific applications of AI in the educational process in individual subjects, implemented by team members. The output will be in the form of descriptions of examples of AI application in education, including commentary - feedback. Outputs are on **national level in a national language**. This is part of a pilot phase, the application of relevant examples.

National level

5 + 6 Each national team is responsible for the implementation of at least one training session at their university and will conduct feedback at national level. **Applicant and each partner are responsible for project www page.**

7.

Editing and publishing **special Issue Business Trends** with focus on AI implementation (Product), coordinator is responsible, deadline 28.2.2025.

Coordinator is responsible

Papers in the special issue of Business Trends will be published in English. They will be available on the journal's website. Indexed in DOAJ (<https://doaj.org/>) and supported by publication on the well-known portal ResearchGate for experts from universities, practice and general public.

8. **National workshops, national best practices, publishing materials for teachers on www portals (Product)**

01/01/2025 – 28/02/2025

National level

National workshops managed by each partner. These activities are aimed at development of materials for teachers (examples of best practices + manuals), application of AI in the teaching and learning process. The outputs will be articles with didactic value published on web portals (e.g. CZ: rvp.cz, PL: Repozytorium UJ RUJ, SK: mpc-edu.sk, Hu: moderniskola.hu).

Each partner is responsible for the preparation, implementation and evaluation of this part of the project. Furthermore, the output will be presented and reviewed at the next F2F workshop of the project team.

9.

Workshop in Brno, project team cooperation and sharing experience with experts from practice (Event)

Coordinator is responsible, all teams participate

3/2025

The exact time we have to determine, again arrival on the first day, the whole second day - activities, the next day the last meeting in the morning.

Workshop in Brno (for all project participants), cooperation with experts from business and education practice, sharing information about implementation of AI (round table), feedback from practice. **Presentation of national outputs and evaluation of achieved results.** Updating materials for workshops with teachers at universities and for activities with students in the educational process. The output will be recommendations for the implementation of innovative training and educational activities at national level. Meeting minutes, list of recommendation, new list of available and useful AI tools for innovation of teaching and learning process.

PL, SK, HU – each partner 4 persons, CZ J.H. – 2 persons, CZ P. – 4 persons
+ external guests from education and business

10.

Updated training for university students (Product)

01/04-31/05/2025

This updated training will not be in the form of a workshop, but instead will be about specific applications of AI using in the educational process in individual subjects, implemented by team members. The output will be brief descriptions of new or updated examples of AI application in education, including commentary - feedback. Outputs are on a national level in the national language. This is the second version of the training materials implemented into real practice at universities. The aim is to innovate and change the learning process using AI tools and activities used AI.

11.

Updated training for university teachers (Product)

01/04-31/05/2025

Updated presentation focuses on the use of AI applications in education (including relevant examples). This is the second version of the training material based on the results of the project, round table with practitioners, and the team's discussion, which will be presented at the national level in the national language. Workshop for teachers from institutions participating in the project. The aim is to innovate and change the teaching process using AI tools.

Coordinator is responsible, all teams participate

12.

Project evaluation, online meeting, media release, final report (Product)

6/2025

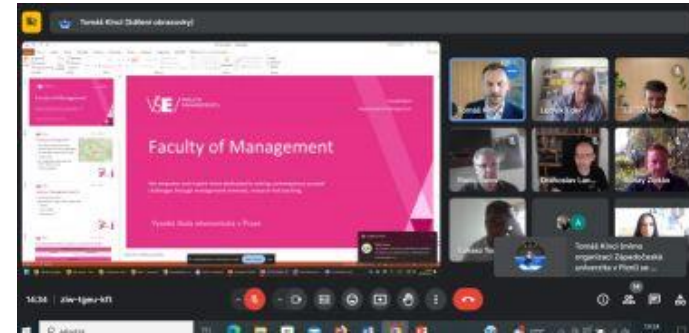

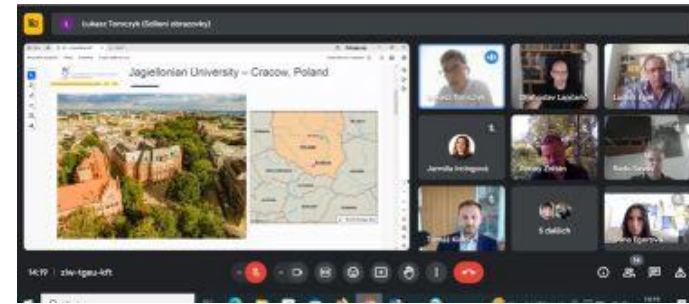

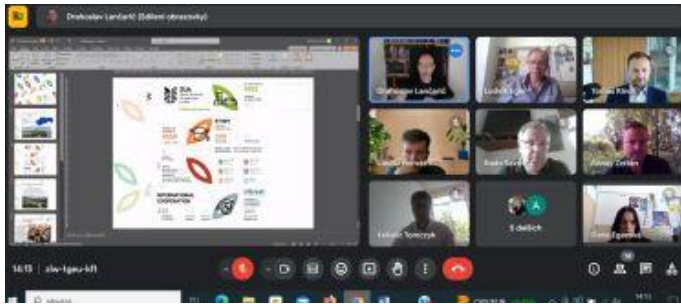

The output includes the following event and activities - evaluation meeting and products, a media release and a final report. This final part of the project includes the project closure activities. First, the national team leaders will evaluate the last phase of the project (this uses internal information from the national team evaluation) using an online meeting. They will prepare a media release on the project and its successful completion, as well as on the expected follow-up activities of the cooperation between the partners. The applicant will prepare a final report for the Visegrad Fund. The stage will evaluate the objectives of the project.

Responsible are the national team leaders and the project leader from the applicant institution.

Please document every activity, don't forget PR. Visegrad Fund requires, monitors and appreciates it.
